Lava[®] Con LDA

Function Cationization agent for special effects

Properties

- special cationizing agent for the vintage effect
- can be applied by exhaust method in alkaline conditions
- easily diluted in water in any ratio
- it has resistance to hard water
- due to its cationic character, it can not used with anionic substances
- comparing to a traditional garment dyeing with pigments, it avoids the staining of the machinery

Chemical Characteristics Cationic polymer solution

Technical Data

Appearance: yellow liquid

pH: 6 - 8

Ionicity: cationic

Shelf life: 12 months in original closed containers

Application

To use as a cationization agent with Lava Dye Antique dyes

After pretreatment:

3-4 g / l Caustic soda(38 Be),

3-4 g / l Lava Con LDA, 5 min. run at 30 C

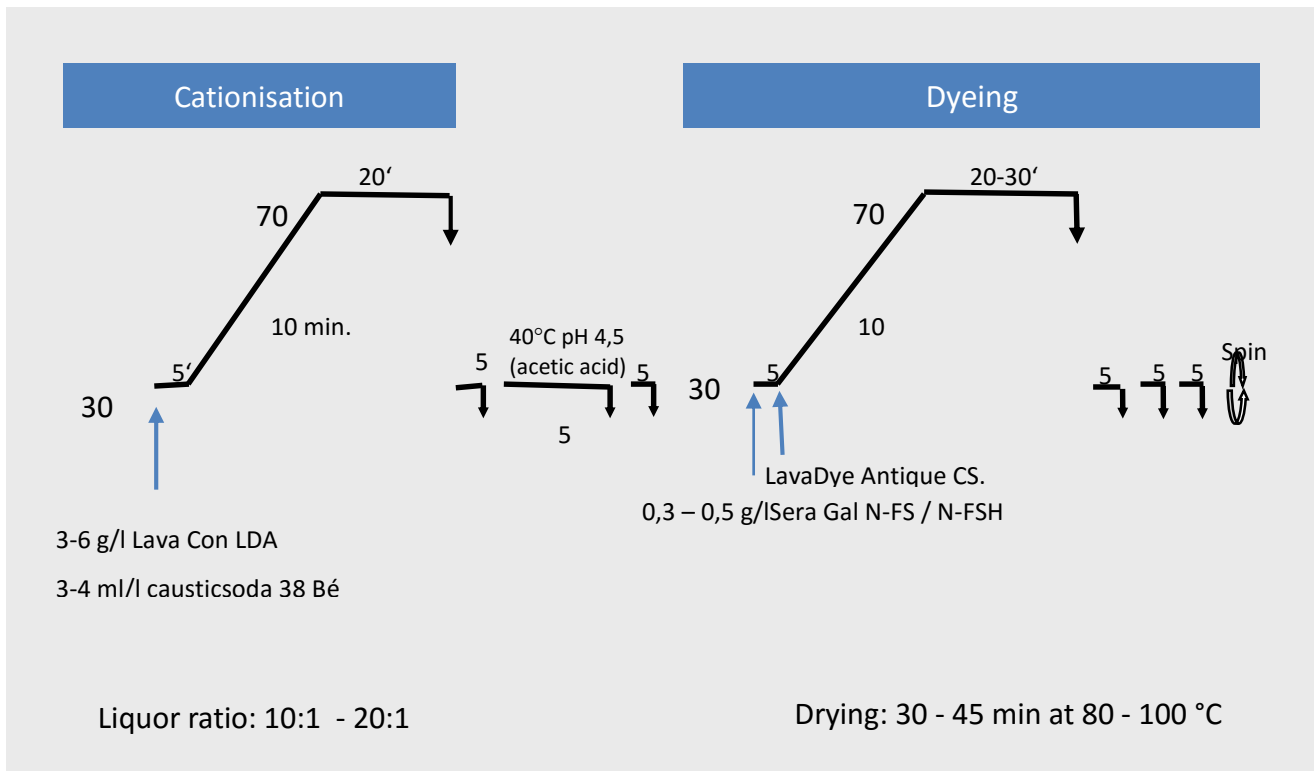

70°C , 20 min run, drain

Rinse wash 5 min at 40 C

Rinse wash 5 min with acetic acid at 40 C

Rinse wash 5 min at 40 C

Dyeing process

For dark shades ,Lava Con LDA usage amount should be over 4 g/l
